K Series

Expansion Joint Cover System

K20-41-11 Illustrated

Description:

The K Series is a cover plate system designed for floor expansion joint applications. It is either an all metal product or metal and neoprene product allowing plus and minus 25-100% movement in nominal expansion joint gaps of 1" to 6".

Options:

Floor To Floor, Floor to Wall, Surface Mount, Cast-in-place, Aluminum, Bronze, Stainless Steel and heavy duty.

Typical applications:

Interior Pedestrian, Gym floors, pneumatic and hard wheel carts for thermal movements.
