

## H SERIES

The H Series is a snap-on cover system with a glide plate design for wall and ceiling expansion joint applications. The snap-on device has a hidden fastener to provide continuous mechanical attachment of the metal cover plate to the substrate. These allow plus and minus 50-100% thermal movement in nominal expansion joint gaps of 1 to 12 inches.

**Options:** Wall to Wall, Corner Wall, Ceiling to Ceiling and Ceiling to Wall, Bronze, Stainless Steel, Clear Anodized, Color Anodized, Custom Painted and New Generation Finishes. (See page 18)

**Typical applications:** Interior wall applications for CMU and drywall in either surface or flush mounted conditions.

### Wall to Wall / Ceiling to Ceiling

Wall to Wall / Ceiling to Ceiling				
System	A	B	C	Finish
H10-51-14	1	4-3/8	5/8	Aluminum
H20-51-14	2	6-5/8	5/8
