J Series

Expansion Joint Cover System

J20-71-44 Illustrated

Description:

The J Series is an accordion system for wall and ceiling expansion joint applications. It is a combination metal and elastomeric seal product allowing plus and minus 25-50% thermal movement for nominal expansion joint gaps of 1" to 2".

Options:

Wall to Wall, Corner Wall, Ceiling to Ceiling and Ceiling to Wall with vinyl seals in multiple colors.

Typical applications:

Interior wall applications for CMU and drywall in either surface or flush mounted conditions.
